

# Wireless Leased Lines

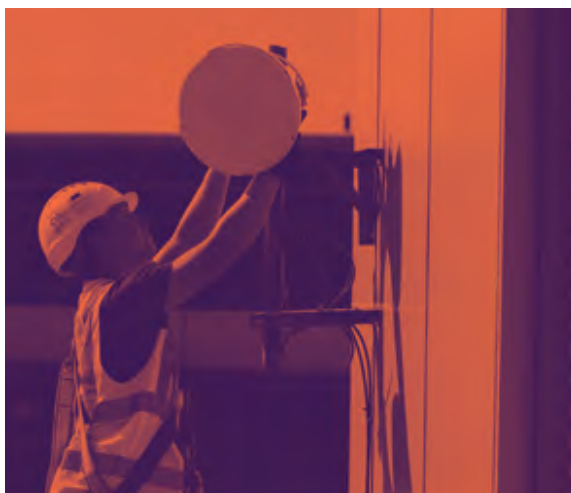

**The performance your business needs –  
without the wires**

Our enhanced Wireless Leased Lines provide all the benefits of a dedicated circuit without the costly installation of a fibre connection.

Traditionally, private fibre circuits cost thousands of pounds to install depending on the distance from the nearest exchange. Instead, wireless offers one modest fixed fee that is not subject to any post-survey construction charges.

Our next-generation network uses industry-leading radio technology to bypass traditional copper and fibre networks. Our best-in-class wireless services provide ultrafast connectivity without the headaches associated with subterranean leased lines.

Delivered over scalable circuits – Wireless Leased Lines allows you to expand your bandwidth as needed – with excess bearer capacity to enable future upgrades. Unlike fibre solutions, we also offer you the flexibility to relocate your connections when you move premises within our service areas.

## Product benefits and features:

- Symmetrical bandwidth between 10Mbps and 2Gbps
- Dedicated connectivity for your business
- Fast delivery – 25 days from landlord approval
- 100% independence from BT exchanges
- Guaranteed network availability with 99.95% uptime and 4-hour fix
- Scalable and flexible connectivity
- Low latency for Cloud services and VoIP
- Connectivity via DIA, MPLS and Layer 2
- Fixed delivery costs and no excess construction charges

## Business benefits:

### Flexibility:

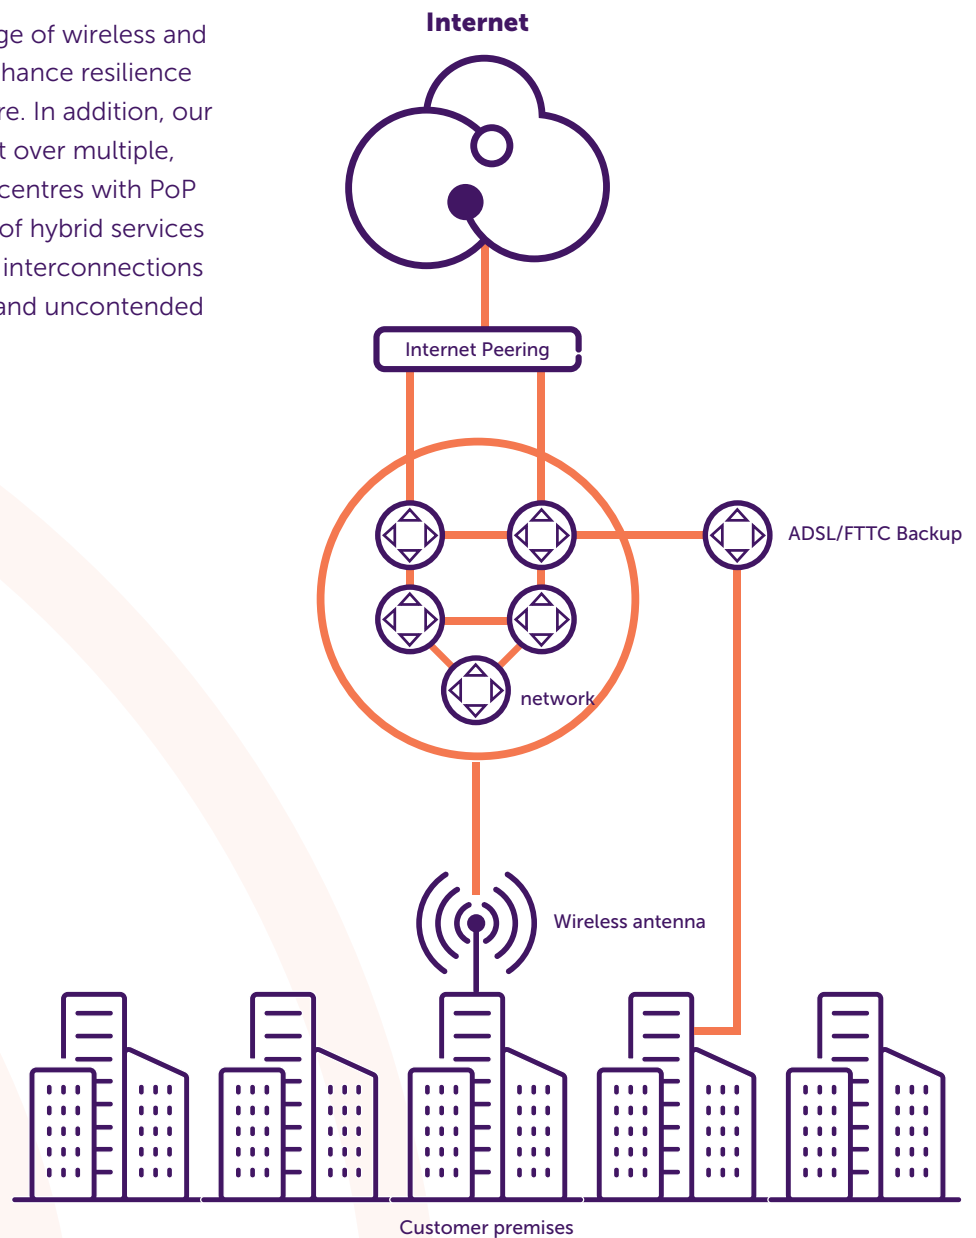

Our Wireless Leased Lines are delivered over scalable radio circuits, allowing you to expand your bandwidth as needed, with excess bearer capacity that enables future upgrades. Unlike fibre solutions, we also offer you the flexibility to relocate your connections when you move within our service areas.

### Resilience:

We provide a complete range of wireless and fixed line connectivity to enhance resilience with no single point of failure. In addition, our network architecture – built over multiple, geographically diverse datacentres with PoP sites connected over a mix of hybrid services – ensures highly diversified interconnections that provide uninterrupted and uncontended capacity for all customers.

### Manageable Costs:

With fixed installation costs and no excess construction charges, our competitive monthly pricing makes it easier for you to manage your IT spend. Our reliable and proactively monitored network also helps to reduce subsequent network management time.
