Ultrafast Broadband

Get fast broadband deals with our Ultrafast Fibre Broadband.

Ultrafast is the best business broadband we offer. It can handle the basics like email and web browsing while also allowing you to take advantage of data-heavy applications. It's a speedy, seamless and secure solution with a budget-friendly price tag.

What is Ultrafast Broadband?

Our ultrafast fibre broadband solution has download bandwidth options of 150Mbps G.fast broadband or 300Mbps FTTP with a variety of contract lengths, allowing your business to embrace the latest technologies to propel you to the next level.

And, as always our connectivity products all come with unlimited data and free DDoS security, so you've got peace of mind no matter what.

Ultrafast is the speediest internet we offer for businesses that are after an all-singing, all-dancing broadband solution.

Also known as, Fibre to the Premise (FTTP), this type of connection means your data will travel straight from the source to your premises, via fibre optic cables. Using fibre optic cables means your internet is much less susceptible to environmental factors, meaning there'll be no degradation in quality over time.

Benefits of Ultrafast Broadband

- Unlimited data
- Download bandwidth options of 150Mbps G.fast or 300Mbps FTTP
- Free DDoS Security
- 24/7/365 UK-based support and customer service
- 12, 24, or 36-month contracts available
- Free WiFi router and static IP address
- Free online billing and reporting
- Discounted Daisy lines and calls packages when purchased with Daisy Broadband

Why Daisy?

Business-grade services

Your ultrafast broadband service won't be impacted by residential traffic during business hours as we work solely with UK businesses. It'll also be managed and transported efficiently so that it won't slow down during peak times.

Speed promise

We're one of just a few business fibre broadband providers that will give you upfront and transparent speed estimates because we've signed Ofcom's Voluntary Codes of Practice on Business Broadband Speeds.

Great value

The combination of our unique commercial agreements and our independence means that we can get the best ultrafast broadband deals from major suppliers including TalkTalk, BT and Virgin.

Cybersecurity protection

Our distributed denial of service (DDoS) protection comes as standard with our ultrafast service you can rest assured that we'll be monitoring your service 24/7/365 to keep you protected.

Breadth of choice

Take advantage of cloud-based applications with our ultrafast fibre service which offers download speeds of either 150Mbps or 300Mbps. All packages come with unlimited data usage and a static IP address.

Excellent customer service

Our 4.6 score on Trustpilot is evidence of our commitment to our customers and the service our friendly, UK-based 24/7 fault team provide. We've also owned and operated our own core network, which we've done for more than 25 years..

SoGEA Broadband

What is Single Order Generic Ethernet Access (SoGEA)?

Discover the power of SoGEA – our one-stop broadband solution that eliminates the necessity for a traditional phone line, delivering a cost-effective and highly efficient service for your business. SoGEA broadband operates by utilising fibre optic cables that run from the telephone exchange to local telephone cabinets. This closely resembles the way Fibre to the Cabinet (FTTC) works, without the need for copper cables for phone calls, which is why SoGEA is a perfect replacement product for FTTC.

SoGEA sets itself apart by remaining unaffected by the impending PSTN Switch Off, ensuring your business enjoys a dependable and uninterrupted connection. With SoGEA broadband, you can achieve speeds of up to 80 MB/s, and it seamlessly integrates with Voice over Internet Protocol (VoIP) services. This powerful combination allows you to consolidate your phone and broadband services into a single connection, making it easy to transfer your existing phone number and business broadband service to a unified platform.

Benefits of SoGEA

- + Choose from download bandwidth options of 40 MB/s or 80 MB/s, accompanied by an impressive upload speed of up to 20 MB/s, guaranteeing efficient data transfer and seamless browsing experiences.
- + Enjoy the peace of mind that comes with our dependable, UK-based faults team, available 24/7, 365 days a year, ensuring assistance is just a call or click away whenever you need it.
- + Receive a complimentary static IP, granting you stable and secure access to your network and services, enhancing reliability and security.
- + Ideal solution for hosted voice services, equipping businesses with cutting-edge communication tools and capabilities to stay ahead in today's competitive landscape.

Why Daisy?

-  **Business-grade services.** We only work with UK businesses, meaning your service isn't impacted by residential traffic. Your traffic will be managed to ensure your connection doesn't slow during peak times.
-  **Great value.** As an independent provider, we'll get you the best services and our unique commercial agreements mean you'll get some of the most competitive prices in the marketplace.
-  **Breadth of choice.** If you want scalable dedicated internet access, we have a variety of highly secure FTTP and Ethernet options.
-  **Excellent customer service.** 96% of our reviews on Trustpilot are 5-star, which is evidence of our commitment to delivering the best customer service.
